What Massage Can Do For You

Beyond Pain Relief, Massage is Valuable for Preventive Care

Karrie Osborn

This article first appeared in the Summer 2013 issue of Body Sense.

Whether it is an aching back, recovery from an injury, a case of carpal tunnel syndrome, or a host of other debilitating physiological conditions, there's no doubt massage and bodywork works to relieve pain. But once your therapist has helped you tackle your pain, do you quit calling? When the pain is gone, are you gone, too?

Massage therapy is highly effective for pain relief, but it is an amazing preventive therapy as well. Massage helps build and maintain a healthy body (and mind), it combats stress, and it works to

Massage can play an important role in a good health-care regimen. Just as you eat healthily, exercise regularly, and take your vitamins to ward off illness and maintain a fit body, you should consider making frequent massage a part of your wellness lifestyle.

According to Benny Vaughn, a sports massage expert in Fort Worth, Texas, one of the benefits of consistent and regular massage therapy is better flexibility. "This happens because regular and structured touch stimulus enhances the nervous system's sensory and spatial processing capacity," he says. "That is, the person becomes more aware of her body's movement in space and becomes more aware of tightness or

keep the immune system strong. In short, massage can keep on working for you, even after the pain is gone.

MESSAGE FOR WELLNESS

If it's been a while since you booked your last massage--because your pain is no longer an issue or your injury is fully rehabbed--you might want to consider massage for preventive care.

pain long before it reaches a critical point of mechanical dysfunction."

As a preventive measure, frequent massage puts you more in tune with your body. "The consistency of massage therapy over time creates a cumulative stress-reduction effect," Vaughn says.

"The person becomes acutely aware of stress within her body long before it can create stress-driven damage."

And the more massage you receive, the more benefits you reap. "Massage therapists know that people who get massage regularly demonstrate greater improvement and notice a reduction in pain and muscular tension, as well as an improvement in posture," says Anne Williams, author of *Massage Mastery: From Student to Professional* (Lippincott Williams Wilkins, 2012).

"People regularly make a commitment to fitness," Williams says. "People regularly make a commitment to changing their diet. The difference they'd experience if they regularly made a commitment to massage is mind-blowing."

STRESS IS A KILLER

Stress is more than just a word we throw around to describe the nature of our hectic day. Today, we understand that stress kills.

According to the Benson-Henry Institute for Mind Body Medicine, 60-90 percent of all US medical visits are for stress-related disorders. Chronic pain, headaches, heart disease, hypertension, and ulcers can all be wrought from stress. Many would argue that the best benefit of massage is its ability to reduce the stress in our lives.

From the perspective of daily living, think about the stress you felt at today's meeting--now it's hiding in your neck. Tomorrow that can turn into stiffness and eventually begin to affect other parts of your body. If you see your massage therapist for your regular session this week, the chances are good you won't reach the tipping point. Think of massage and bodywork as a way to rebalance your body.

Noted researcher Tiffany Field and her colleagues from the Touch Research Institute at the University of Miami School of Medicine report that massage causes positive biological changes when it comes to stress. Through the course of more than 20 studies, these scientists found that massage decreases cortisol (a stress-derived hormone that negatively affects immune function and kills our immune cells) and increases dopamine

and serotonin (the neurotransmitters most associated with emotional well-being).

Add to this the research that shows massage can lower your heart rate and decrease your blood pressure, and you have a mighty effective, nonpharmacological, stress-fighting tool that's about as natural as natural can get.

A ONE-HOUR VACATION AND SO MUCH MORE

You may no longer need to rehab that knee or work the scar tissue from your surgery, but don't forget about everything else massage can do for you. Massage is the entire package, helping to heal body, mind, and spirit. Think of it as a one-hour vacation with amazing return on investment.

Whether it be maintaining joint

flexibility, managing blood pressure, or enhancing immunity, massage works. From repair to relief and from recovery to relaxation, massage is a magnificent piece of natural medicine you should always have as part of your health-care routine.

The Health Benefits of Ginger

Easing Nausea, Joint Pain, and Allergies

This pungent spice is found in cuisine around the globe, but ginger has also been used for more than 2,500 years for its medicinal properties. The ancient Chinese knew that it aided in the absorption of many herbal preparations and they prescribed it extensively as a digestive tonic.

A native root of southeast Asia, ginger is a potent ally in the treatment of nausea, motion sickness, and joint pain. Current research confirms ginger's efficacy as an anti-inflammatory, GI calmativ, and antihistamine. The active ingredients found in ginger -- gingerols and shagoals -- lower levels of prostaglandins, the chemicals responsible for pain and inflammation in joints and muscles. By reducing prostaglandins, ginger can even have a positive effect on heart health and circulation because chronic, systemic inflammation increases the risk of heart attack and blood vessel compromise.

Ginger comes in several forms. Fresh

and dried ginger is available in supermarkets for use in cooking. It's also available in capsules, an extract pill form, prepackaged tea bags, crystallized, and as a topical oil.

Recommended Uses

MOTION SICKNESS AND NAUSEA

Most medications for nausea and motion sickness work to calm the nervous system and can cause drowsiness and dry mouth. On the other hand, ginger calms the digestive tract directly and has been shown to reduce nausea after surgery and chemotherapy. For motion sickness, take 100 mg two hours before departure and every four hours afterwards or as needed.

ARTHRITIS AND MUSCLE ACHES

Massage ginger oil into affected areas and/or take up to 1 g of powdered ginger daily to reduce inflammation.

COLDS AND ALLERGIES

Drink up to 4 cups of ginger tea daily or enjoy authentic ginger ale (made from

real ginger).

While ginger has no known side effects, it's always a good idea to consult your health care practitioner to make sure it's right for you.

The ginger plant has many medicinal uses.

Easing Holiday Angst

Five Stress Busters for a Joyous Season

You enter the holiday season with the best of intentions -- looking forward to time spent with family and friends, decorating, shopping, baking. But as soon as you pile holiday activities on top of an already busy life, you're likely to find yourself relating more to Ebenezer Scrooge than Martha Stewart.

Consider these five suggestions to keep holiday stress at bay:

1. DETERMINE A SHOPPING BUDGET

For many, gift giving is an important part of the holidays, serving as a way to express love and appreciation for friends and family. But when the credit card bills arrive in January, you may discover you've extended your holiday stress well into the New Year. Plan your budget in advance, determine what you can spend, and stick to the plan.

2. CREATE A TIME BUDGET

Many will make a shopping budget, but what about making a time budget? Before accepting every invitation this year, decide ahead how many parties you can and want to attend while maintaining your sanity. Make choices about your time commitments based on what you'd really like to do this year, rather than what you think you should do or what you've always done. Don't forget to leave time for yourself.

3. SET FOOD-INTAKE BOUNDARIES

You'll likely be tempted to eat in excess, and don't be too hard on yourself if you don't stick to your pre-holiday eating standards. But do decide ahead of time just how much you'll deviate from your eating routine.

4. STICK TO YOUR EXERCISE REGIMEN

Regular exercise is a powerful stress buster. You'll feel better, sleep better, avoid weight gain, boost your immune system, and maintain a positive outlook about yourself. While it may seem like an easy time concession to make, don't give in to the idea. Stick to exercise, and you'll thank yourself for it.

5. TAKE TIME TO REST

Take time from your schedule to honor the cycles of the season. The holidays fall during winter solstice -- the shortest day of the year. Learn from nature, and get plenty of rest.

Massage
Therapy!!!*

I have two services I offer before the massage to enhance the experience. One being The Chi Machine and also Skin Brushing.

The Chi Machine works as you lie down on the floor. You put your ankles onto the footrest and it moves your body from side to side. It's designed to help the Chi energy or the primal life energy within you flow, as it was intended to. Some of the benefits are spinal balance, improved immune system, increased energy and weight loss.

\$1.00 a minute up to 5 minutes to begin with.

The primary benefit of Skin Brushing is it assists in exfoliation of the body's dead skin cells. Skin Brushing also stimulates the nerves of the skin and feels wonderful!

\$10.00 for 10-15 minutes.
